FOR IMMEDIATE RELEASE: Amesbury opens new Extruded Products manufacturing facility

Cannon Falls, MN, -January 31, 2012—Amesbury, the leader in window and door components announces that its Extruded Products division will locate its newest production facility in Covington, GA.

“Amesbury’s Extruded Products Division is excited to be expanding its operations in Covington, GA. We currently have Extrusion operations in Cannon Falls, MN and Ontario, CA with additional future growth already being planned. The Covington facility allows us the ideal location to reach the East Coast and Southern US region” says Todd Betterley, Vice President of Amesbury Extruded Products.

“The location of our new facility will allow more flexibility in freight savings and logistics for our customers and will allow us continued growth into new markets as part of our strategic growth plans” says Brian Woodman, Director of Sales & Marketing for Amesbury Extruded Products.

Production at the Covington, GA facility is expected to begin February 2012. “Our growth continues as part of our strategy to become the premier national extrusion supplier. Our investment continues in these tough economic times as proof of our commitment to the building products industry” says Jonathan Petromelis, President of Amesbury.
