

*Reliable Resource.  
Superior Solutions.*

Amesbury continues its tradition of constant innovation by rolling out 3 new constant force systems to its Omega line.

- ✓ The Hyperion is an egress system that can mount above the tilt latch using existing Universal coils. Previously a separate coil size was needed.
- ✓ The Inverted product offers better egress and operating forces than the existing Constant Forces systems available in the market. Our exclusive T head design allows an easier and faster installation while maintaining a greater breaking force.
- ✓ The 10LB coil offers additional inventory level reductions and cost savings.

Check out these and other exciting new products from Amesbury, where the focus is always on innovation that brings results. Please call 888-924-7694 for more information on the Constant Force systems.
